## PROJECTS

---

### Pizza-App

Jan 2022 - Mar 2022

This project is a modern and user-friendly pizza ordering application built using React JS and React Bootstrap for the frontend, while the backend is powered by Node.js, Express.js, and MongoDB for data storage. It incorporates Redux for state management, Stripe for secure payment processing, creating a seamless and efficient online pizza ordering experience.

### Hotel-Book

Mar 2022 - May 2022

The Hotel-Book project is a sophisticated hotel booking platform crafted with React JS and React Bootstrap on the frontend, and Node.js, Express.js, and MongoDB on the backend. It employs Redux for state management and Stripe for secure payments, offering users a streamlined and secure experience to book accommodations effortlessly.

### Amazon-Ec

Jun 2022 - Aug 2022

Amazon-Ec is a cutting-edge e-commerce platform developed with React JS, React Bootstrap, and Ant Design for the frontend, alongside Node.js, Express.js, and MongoDB for the backend. Leveraging React Router v6 and Hook Form v7, it offers a seamless and feature-rich online shopping experience with advanced functionality and user-friendly design.

## TECHNICAL SKILLS

---
